

Why should your team start using NoiseNet DASHBOARD and LEGAL REPORTS?

• 24/7 data to solve long term issues

Noise nuisance isn't about one hour, it isn't about 4, it is 24/7 and over prolonged periods of time. Get this data without leaving your team in the field. Rapid, accurate results giving you the power to resolve noise complaints fast.

2 Third-party, legal back-up

Not supported by management, elected officials, or auditors? Or want the heat off your organization. NoiseNet offers a third party solution for evidence gathering, analysis and expert witness services. Mostly we keep cases out of court, but we have always achieved the desired outcomes of our customers.

3 Cut the cost of resolution and legals

The Dashboard allows you to receive initial data within 1 day of installing the monitor. Within just days you have over 100 hours of evidence.

And if you are going to the expense and effort of court or adjudication, why would you use anything but the best possible evidence?

Effective Noise Complaint Resolution

The Problem:

- Noise Nuisance is a serious issue affecting stress levels, sleep, mental and physical health
- Noise Complaints are the biggest source of calls to most Cities and Municipalities
- Noise issues are a 24/7 problem, and current processes rely on short duration intervention
- Inability to gather robust evidence means most authorities end up doing little

Introducing **NOISENET** Assisting you to solve noise complaints, faster, fairer and more efficiently

Rapid, Detailed Investigation Tool Use of the NoiseNet DASHBOARD tool to gather 48-60 hours of data within days. You know the facts and can act with confidence

2 Enforcement Evidence

Once a noisemaker fails to resolve the issue, we then provide a court quality REPORT presenting the gathered evidence to ensure your action is successful.

2 Historical Data

Extensive historical data available for analysis, baselines, empowering the regulator.

THREE Steps to Gathering definitive noise data:

Install a NoiseNet Monitor in the field

Mount the device, connecting to mains power. Check calibration and submit an electronic field report.

This typically takes 15 to 20 minutes.

From that point on, the device is monitoring the sound environment on a 24/7 basis.

2 Upload & Analyse

We upload the data to our server then analyse using state-of-the-art artificial intelligence techniques to extract the relevant data.

We affordably provide you with 100's of hours of analysed data, presented in the form of reports, alerts or by DASHBOARD

Sent directly to your inbox each day, the DASHBOARD gives you the power of knowledge.

By knowing the facts in the case you can act with confidence to resolve the real issue. Fast.

Standard Smart Noise Monitor Above **PinPoint Directional Noise Monitor Below**

Noise Net Brings the power of technology to better solve noise issues for happier, healthier communities and environments

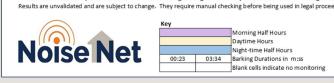

3 Interpret the results

coded system, whether there is no nuisance (white), or a clear nuisance (red).

The visual presentation makes it easy to see patterns of noise, and to both prove the existence (or absence) of nuisance so you can close cases rapidly.

LEGAL REPORTS

For those cases that go beyond simple resolution, NoiseNet also provides legal quality reports suitable for justifying enforcement actions or back-up in court. We have a 100% win record to date (April 2024).

PinPoint DIRECTIONAL DATA

NoiseNet delivers directional noise results helping prove the source of the noise (see example on right), giving you even greater confidence in your conclusions.
